FFP3 Mask with Valve

- Traditional convex shape with nose clip.
- E-Valve design provides cooler and more comfortable wear.
- Inner face-seal ring.
- Reliable and effective protection against fine particles with high performance filter material
- Durable, collapse resistant inner shell
- Comfortable and lightweight 4-point adjustable straps
- Conforms to EN 149:2001 + A1:2009

CE Certified

ISO 9001

Code: CL291

>99%

BEF filtering capacity of particles with a mass median diameter of 0.3 micrometers

BEF: Bacterial Filtration Efficiency

Protection up to the corresponding threshold value (OELs).

Type IIR Disposable Masks

- Type IIR masks are fluid resistant. These medical face masks are intended to be worn to protect against the spread of transmission of infections germs as well as protecting against the splashes of liquids and particles.
- Outer layer: polypropylene non-woven fabric, water-repellent effect layer.
- Middle layer: provides a highly protective filter layer, bacterial filtration rates greater than 98% and particle filtration rate is greater than 95%.
- Inner layer: polyester soft skin-friendly non-woven fabric.
- Medical devices directive 93-42-EEC
- EN 14689 2019

Thumb Loop Blue Gown

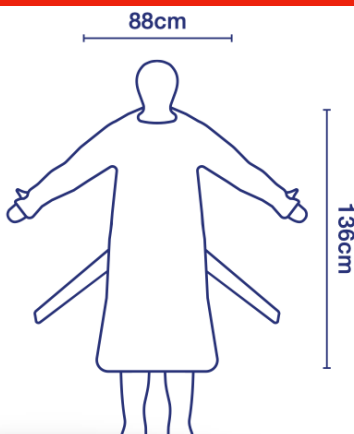

Code: CL300

- Our fluid resistant single use thumb loop gown offers the users a high degree of comfort and protection where low risk of fluid is present. Non-Sterile, mainly used in barrier helping to prevent the spread of infection from one person to another in hospital and for minor procedures within the hospital or community setting.

Features

- One size gives the wearer protection below knee and above the ankle
- Sleeves are long enough to ensure the arms are fully
- Waist ties are 65cm (+/-10%) and should not touch the floor when being worn
- Fluids Impervious gown >91cm H₂O
- Halter neck
- Latex free;
- Single use;
- low linting
- Anti-static
- All seams are welded

Colour: Blue
Material: LDPE Polythene 3mu
Dimension: 88cm (W) x 139cm (H)
Tie lengths: 65 cm (+/-10%)
Weight: 100g

Protective Safety Goggles

Code: CL501

- **Safety Goggles:** Double-sided Safety Goggles can protect your eyes by preventing air bacteria, viruses, smog, harmful chemical, dust from entering your eyes.
- **Anti-Fog:** The surface of the lens has an anti-fog coating, which can effectively prevent the formation of water mist.
- **360° Fully Protection:** Soft rubber and nose bridge attach around the goggles, good fit with nose pads, 360° fully protection, and more fit and comfortable.
- **Vent Design:** Adjustable vent design enhance air circulation, more comfortable to use.
- **High Transparent Lens:** High lens transparency rate keep clear vision, impact resistance as well.

Fully Protection

Infrared Thermometer

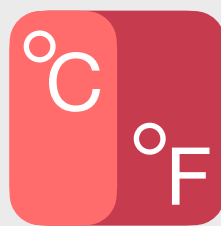

Code: CL504

This Infrared Thermometers design is simple and elegant. It can measure accurately without contact, making it cleaner and more sanitary. It has very good adaptability to environmental changes and can be used in complex environments. It will also register when the users measurements are 'safe', 'slight fever' and 'high temperature'. It comes with a forehead mode and a ear mode, with different heads for each. The probe cover is magnetic, keeping the probe virus free.

- 40 Memory Recalls
- Audio & Visual Fever Warning
- Mute Function
- BPA & Latex Free

1 second Fast Measurements

Celsius and Fahrenheit Measurements

Reusable Forehead Thermometer

Quick, Simple and Reliable. Lightweight and robust, keep it handy.

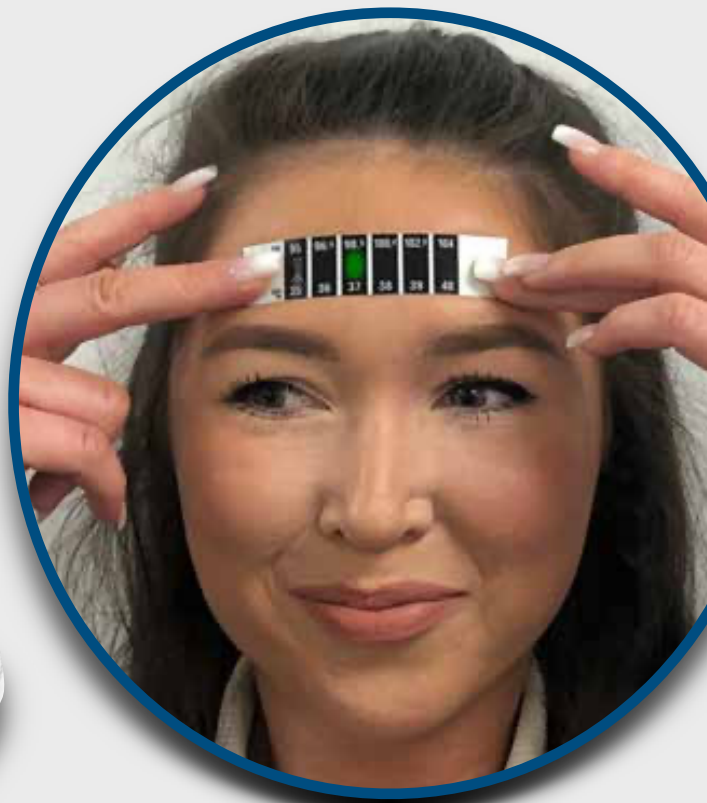

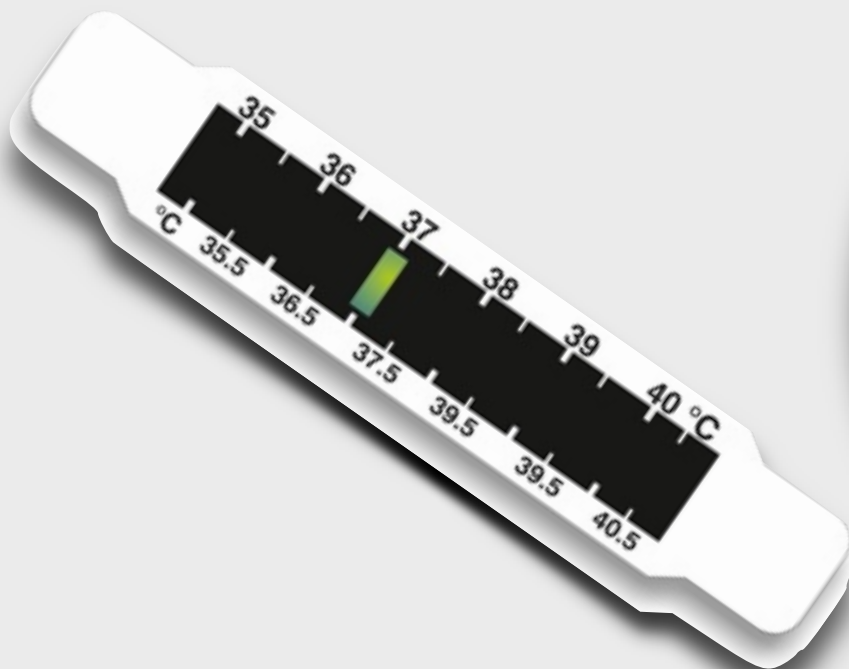

CE Certified

Code: RM086

A range of Forehead and Anesthesia Temperature Indicators for the healthcare sector.

Liquid Crystal technology for the measurement of clinical temperature trends in the healthcare environment.

These liquid crystal thermometers are reusable and designed for use on the forehead area only and are an ideal way to estimate the core body temperature and check for temperature changes. Robust, quick reading can be used between clinical thermometer readings and to monitor trends.

SARS-CoV-2 Antigen Rapid Test

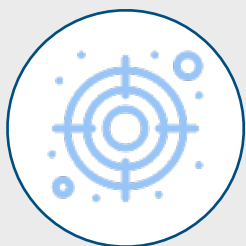

The Coronavirus Ag Rapid Test Cassette (Swab) is an in vitro immunochromatographic assay for the qualitative detection of nucleocapsid protein antigen from SARS-CoV-2 in nasopharyngeal (NP) swab specimens directly or after the swabs have been added to viral transport media from individuals who are suspected of COVID-19 by their healthcare provider. To aid in the rapid diagnosis of SARS-CoV-2 infections.

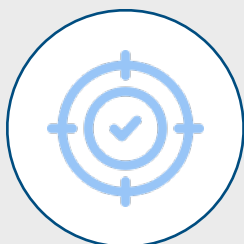

CE Certified

Code: CL511

Performance Characteristics The Coronavirus Ag Rapid Test Cassette (Swab) has been evaluated with specimens obtained from patients. A commercialized molecular assay was used as the reference method. The results show that the Coronavirus Ag Rapid Test Cassette (Swab) has a high overall relative accuracy.

CTEX Covid Air Assist Device

The CTEX Unit has been developed as a biological countermeasure to the Coronavirus pandemic with the UK Ventilator Challenge. One of only a few devices to gain MHRA Approval.

Clean sheet design to counter the threat of Covid-19 and builds on the Proven Benefits of providing Continuous Positive Airway Pressure (CPAP) for Covid-19.

MHRA Authorisation No.
RCX/016/003/019/121

OXYGEN: Only requires between 5-15 Litre/minute oxygen. ROI of 24hrs when compared to other devices on Oxygen use alone.

OXYGENATION: Delivers >70% Oxygen from only 15l/min. Can be used at home with an Oxygen Concentrator. No cylinders required.

Viral Filtration: CTEX draws in room air via two replaceable viral filters. Filters the air of all bacteria and viruses.

SEALED PATIENT CONSUMABLES: Less risk of viral aerosolization for staff and carers. Choice of Nose or Face Mask for convenience.

ANTI-VIRAL: Materials used minimise the lifespan of the Covid-19 virus.

Code	TECHNICAL Specifications
Electrical Voltage	230V 50-60Hz 115V 50-60Hz
Maximum Current	2 Amps (230V) 4 Amps (115V)
Oxygen	5-15 litres / minute (Depending on required FIO2 level)
Physical Dimensions	140 x 205 x 75mm
Weight	~2Kg
Noise	<60dBA
Standard Kit	CTEX CAAD Unit, 1 x Patient Kit (Flexible Tube, PEEP Valve, Filter, Medium Mask) & 1 x Fingertip oximeter
Maintenance Requirements	Every 24 hours; <ul style="list-style-type: none"> • Replace Patient Viral Filter • clean external surfaces
Between Patients	<ul style="list-style-type: none"> • Replace patient circuit • Replace viral inlet filter • clean external surfaces

Ventilator System

Including heated humidifier patient circuit, 0 – 70LPM high flow O2 therapy,+ Integrated Stand System. Pneumatic Oxygen powered ventilator

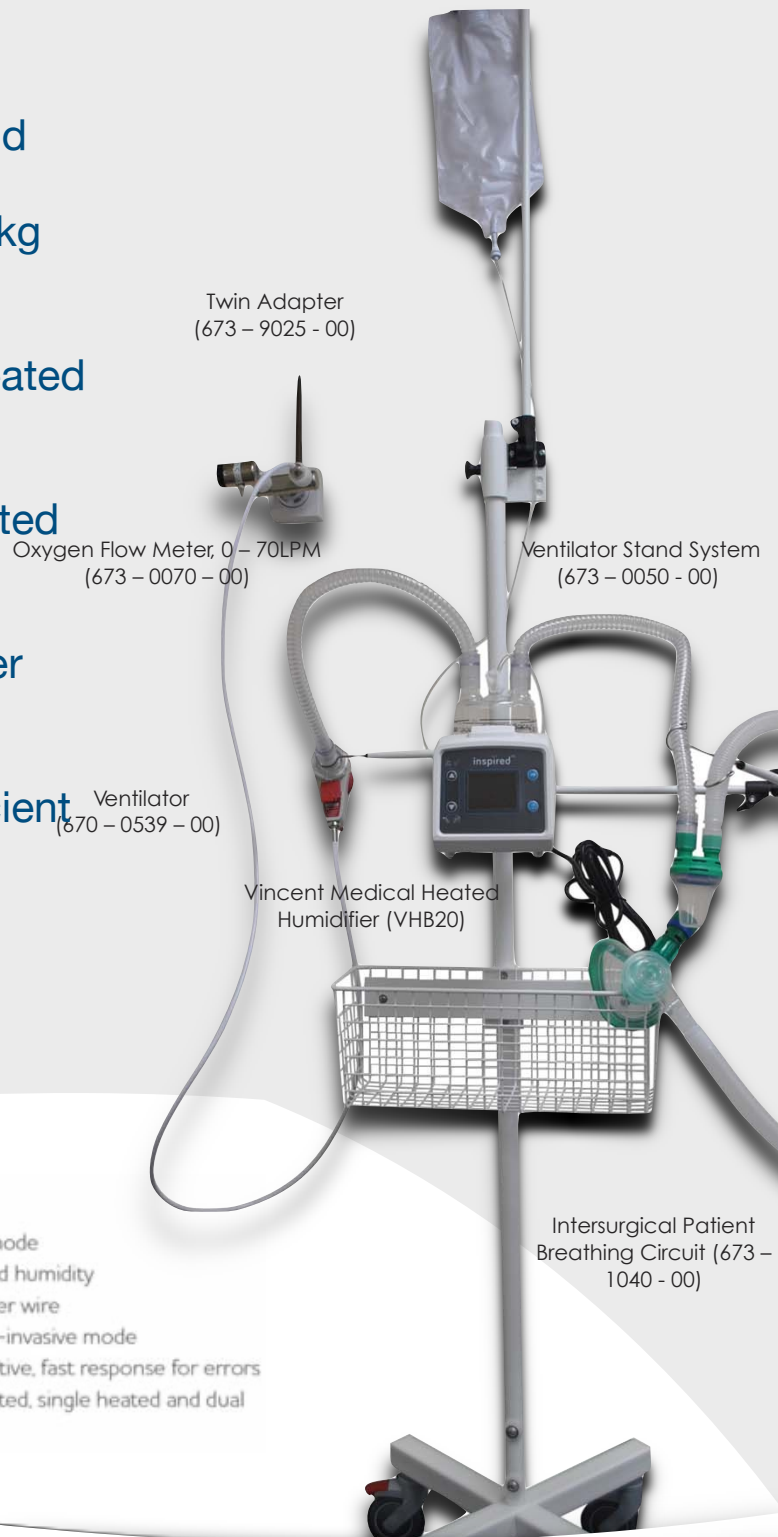

Specification:

- 2 ventilation modes: mandatory VCV and manual
- Suitable for adults and children over 10kg
- Airmix 100% or 50% Oxygen
100% Oxygen only version available
- Humidified patient circuit including a heated humidifier
- PEEP-Variable or Fixed
- Eliminates patient aerosol of contaminated exhaled gas
- No electrical power source required
- CE marked and ISO 13485 manufacturer
- Intubation/LMA device compatible
- Simple airway pressure indicator
- ZERO drive gas - This is the most efficient ventilation possible

VHB20

- Large LCD display with night view mode
- Dynamic control of temperature and humidity
- Individual control of expiratory heater wire
- Two modes: Invasive mode and non-invasive mode
- Safety enhanced alarm system, intuitive, fast response for errors
- Wide range of application: non-heated, single heated and dual heated breathing circuits

Portable Emergency & Oxygen Bags

Oxygen Sensors

The SenzTx is a compact and robust O₂ transmitter that utilises zirconia or electrochemical technology to give a reliable measurement of oxygen concentration.

Applications:

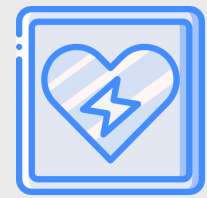

- Gas generation (oxygen / nitrogen)
- Additive manufacturing
- Glove box purge and leak detection
- Industrial gas applications

Features:

- Zirconia or electrochemical sensor technology options
- Measurement range: 0 to 10ppm up to 0 to 100% O₂
Analogue output: 4 to 20mA » Modbus 485
- 24VDC power supply
- M12 electrical connection
- Process connection: KF40 Flange or Flowthrough base
- Combined sensor and electronics allows for ease of integration.
- Fast reponse from ambient air to low
- Issue No. STX01_V2_EN_0720
- PPM oxygen measurement

Defibrillators

SAVER ONE CARRYING CASE

Description AED Carrying Case

Semi-Rigid, for reliable protection and transport of Saver One Defibrillators. Accessories and spare batteries can be stored in its inside compartments. Made of special shockproof and splash-proof material. Zipper opening and “D” ring to hook from the back.

Code: DEFACC04

SAVER ONE SEMI-AUTOMATIC PAD STANDARD 200J

User-friendly PAD reliable for any rescuer even without minimal training. Designed for public access use and licensed to administer fast and safe treatment against cardiac arrest, anytime and before the EMS team arrives. Practical, intuitive with CPR guidance and clear instructions supporting the rescuer through the protocol for an effective lifesaving action. Small and lightweight, works with long-life batteries for maximum portability. The right solution to save lives anywhere: home, offices, schools, hotels, ships, airports, trains, beaches, sports facilities, discos, dentists, etc.

Code: DEFIB001A

Dimensions: 26.5 x 21.5 x 7.5cm (10.4 x 8.4 x 2.9”) Battery options: disposable or rechargeable Power options: 200J or 360J

INDOOR WALL CABINET FOR SAVER ONE

Strong and lightweight Wall Cabinets are designed for indoor and outdoor storage for your AED. A clear polycarbonate cover and green polymer base ensure your AED is protected from harsh environments.

Code: DEFIB100

Grab & Go Bag

Code: CK080

Grab and go bag, quickly accessible and ready to keep you safe in any emergency. Strong, water-resistant material, making the Grab & Go Bag durable, strong, rip resistant and easy to clean.

5 large outer pocket all with double zips; so you can know where everything is and can access it quickly

Contents:

- 6 x 250ml Dr. Browne's Hand Sanitiser
- 8 x 50ml Dr. Browne's Hand Sanitiser
- 100 x Type IIR Masks
- 200 x Nitrile Gloves (Medium/Large)
- 5 x Face Shields
- 200 x Disinfectant Wipes
- 6 x Gowns
- 10 x Snap-seal Bags
- 1 Infrared Thermometer
- 3 x Ponchos

Advanced Personal Protection Pack

A small pouch, with a large capacity, to keep you safe in time of need. Fitted with a water resistant double zip, two belt loops and a clear internal pocket.

Code: CK074B

Contents:

- 50ml Dr. Browne's Hand Sanitiser
- 10 Sterile Wipes
- 2 x Type IIR Face Mask
- 10 Nitrile Gloves (Medium/Large)
- Information Leaflet
- First Aid Guide

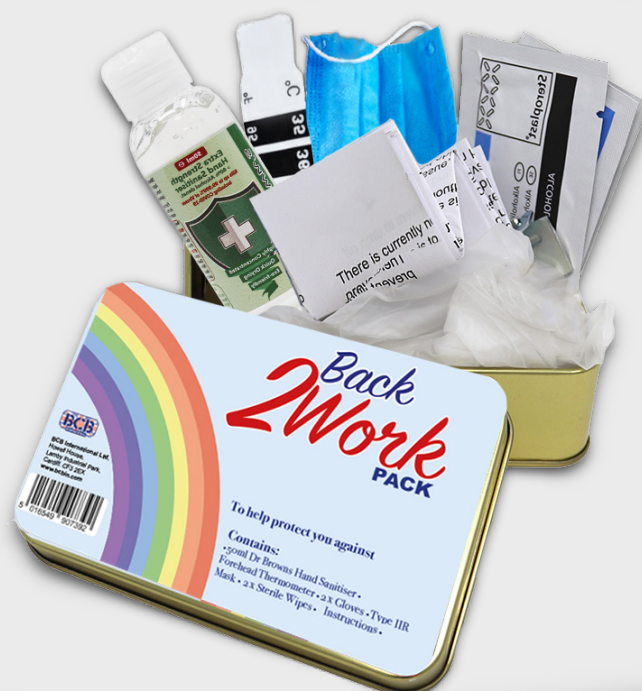

Back 2 Work Kit

Code: CK073A

With many companies returning to work there is an uncertainty on how to stay safe. We have created packs of high quality products, tested by professionals, to keep you safe and reduce the spread of germs.

Contents:

- 50ml Dr. Browne's Hand Sanitiser
- Instruction Sheet
- 2 x Nitrile Gloves
- 3 x Antiseptic Wipes
- Forehead Thermometer
- Type IIR Mask
- 2 x Coin Towels

Resuscitator (with one way valve)

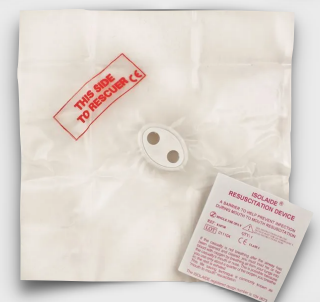

The Resuscitator with One Way Valve can be a life-saving piece of equipment for use in cardiopulmonary resuscitation (CPR – mouth-to-mouth resuscitation) events so it makes a lot of sense for one of these small devices to be in many people's first aid kit, for example.

Areas of use for this device would include accident and emergency, sports and leisure as well as general first aid responses.

- Lightweight and portable for use during CPR
- Ideal for anyone who may need to carry out first aid CPR or

CE Certified

Code: CS122

Anaconda Splint

Can be used to immobilise and support broken or sprained limbs thus preventing further trauma. Ideal for inclusion in first aid kits, especially for field-based training and expeditions etc. These are very handy to even just keep at home, or keep in the scout hut in case of any injuries.

Code: RY273

Compact when rolled: 11 x 8cm (4.5 x 3")

Weight: 140g (5oz)

Length: 91cm (36") Open

ABOUT BCB INTERNATIONAL

For over 160 years, BCB International has built up knowledge and expertise in developing life-saving equipment for the frontline services. Our facility has held a MHRA GDP license for over 30 years, with a heritage of working with the UK government department and military, as well as exporting almost 40% of our products.

Our longstanding and loyal workforce have a wealth of experience in contract manufacturing, supply chain operations, testing and product development. These skills along with our innovation and passion guarantees consistency, quality and safety.

We've devoted our time, resources and investment into applying this knowledge when manufacturing hand sanitiser. We are currently supply to the Welsh and English NHS, British police forces, carehomes and other essential services.

We are here to protect the protectors and save lives. We won't let you down.
