

FLEM® 12 gauge less-lethal ammunition

The FLEM® is a patented less-lethal ammunition for smooth barrelled 12 gauge shotguns. Its unique design delivers a more accurate, safer and effective immobilisation of a target than other less-lethal 12 gauge projectiles on the market.

Key Features

Within two metres of being fired, the FLEM rotates 90° to present a flat and wide contact surface which is stabilised via its flight fin. This large and flat impact surface prevents eye penetrating injuries.

To minimise injury, only the FLEM projectile, without its casing, hits the target. The FLEM's shape limits rebounding and thus any unintended collateral damage. Extremely accurate within a 30x30cm rectangle 20m away.

Caliber:	12 gauge
Material:	Elastomer composite
Dimensions:	Diameter: 18mm Length: 52mm
Weight:	14 grams
Cartridge casing:	Plastic: 0.8g
Maximum speed:	160m/s
Shooting range:	20m
Accuracy:	Within 30x30cm rectangle 20m away
Colours:	High visibility green or yellow

UN Number	UN0012
Risk class	1.4S
Packaging options	Cardboard box or M2A1-type metal box
Package dimensions	306x155x191 mm
