

# SAFE LANE: Rapid Obstacle Clearing Kit

**Light-weight  
quick assembly kits  
to clear Battlefield  
Obstacles**

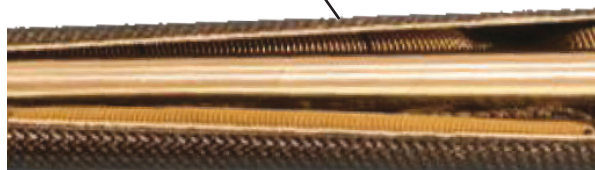

The "Obstacle-Clearing kit" comes with everything required to clear small field expedient and deliberate obstacles, such as: concertina, mines, fencing, barbed wire and other battlefield emplacements.

It is lightweight and fits into a small manpackable belt pouch.

Simply add explosives, such as a detonation sheet, C4 or a slider charge.

**SAFE LANE  
deployed**

Can be joined together  
(with the gaffa tape  
supplied)  
to make a longer system.

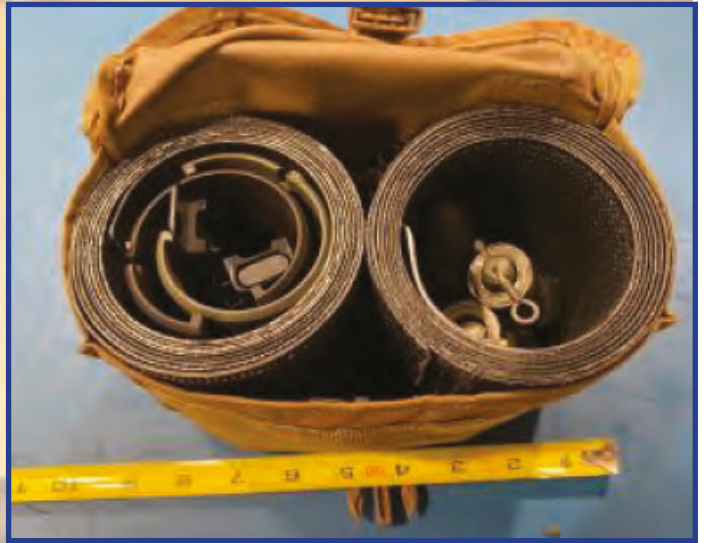

## SAFE LANE: Rapid Obstacle Clearing Kit

Designed to fit both standard military and law enforcement blasting caps, while providing a direct prime.

Eliminating the need for the “det-cord loop” and giving operators the ability to travel safely.

**This is the only priming system on the market that complies with military safety standards.**

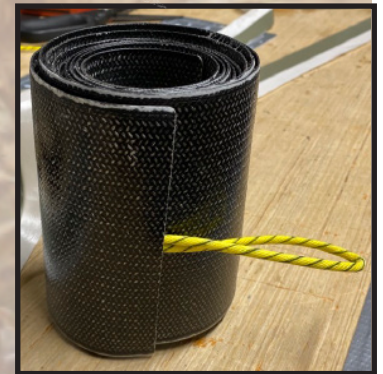

The SAFE LANE is designed to accept additional explosives in seconds making it the perfect system for Sappers, Infantrymen and Explosive Ordnance Disposal units.

- Pouch/Pocket to use in seconds
- Safe, quick arm/dis-arm
- Effective and modular
- No additional Fragmentation
- Light weight
- Variable length and Explosive Weights
- Legacy compatible

It Will Breach :

- Paths, Doors, Walls, Fences, Gates
- Placed Obstacles/ Hasty Obstacles
- Mines, Weapons caches

**The Safe Connector is a two-piece direct priming system.**

Utilising a simple clip-in-clip-out method of priming, the Safe Connection System provides breachers with a safer, simpler, more efficient way to prime.
