WHY Dr. Browne's HAND SANITISER?

Dr. Browne's is one of only a few hand sanitisers tested against viruses.

We've have gone the extra mile and ensured Dr. Browne's is tested against viruses.

EN14476 and A2:2019 viricidal test, proves Dr. Browne's efficacy is to Log 4 or is 99.99% effective against viruses.

We believe hand sanitisers should be tested against viruses. Bacteria tests are not as relevant as viruses which are a lot more virulent. Coronavirus is a virus.

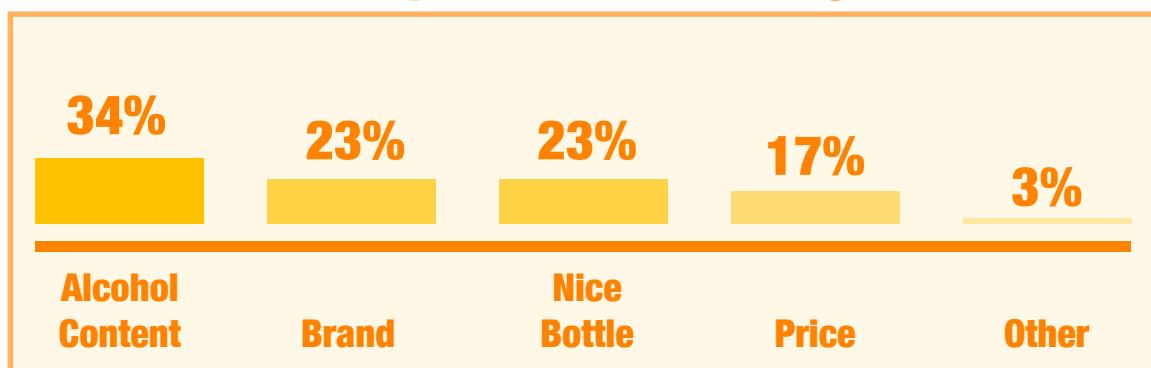

KILLS 99.99% OF VIRUSES & 99.999% OF BACTERIA

Dr. Browne's 80% Alcohol content

Britain's daily routine.

Overall, 42% of respondents said they sanitise their hands five times a day or more. And nearly three in 10 sanitised their hands six times a day

What is most important in choosing a sanitiser?

Source: Harris Interactive survey of 1,080 consumers, October 2020

Experts say hand sanitisers need an alcohol content of at least 60% to work sufficiently. The public seems to have taken that message on board. Seven in 10 respondents said they would want at least 60% alcohol content in their hand sanitiser. And 58% would want 70% or higher.

- The Grocer

As supplied to the **NHS**

Tested & approved to:

- EN 1276:2019
- EN 13727:2012 + A2:2015
- EN 1500:2013
- EN 14476:2013 + A2:2019
- EN 13624:2013

“The trouble with low-alcohol sanitisers is that they might not have been tested or approved with data showing they will work, so they should be avoided if they can”
- Professor Peter Collignon - University's School of Pharmacy.

Sustainable

- British made with locally sourced ingredients.
- The British market is dominated by Chinese or American made brands. Any uncertain event may dry up supply again.
- Refillable and reusable bottles, use the 5 litre to refill your 500ml station or the 500ml to top up your 50ml bottle.
- Our bottles are recyclable

**“52% of consumers say they always take sanitiser with them when they go out and 23% do so most of the time. Only 8% never take a bottle with them.”
- The Grocer**

- Great value for money

About Dr. Browne

In 1854, a Dr Browne came up with a cough medicine and shipped some off to British troops suffering in the trenches in the Crimean war. 60 years later, Dr Browne's Cough Bottle gave the initials for a registered company, BCB.

"Dr. Browne" has now been called back to do his duty for the community.

PROTECTION PACKS

Advanced Personal Protection Pack

Code: CK074B

A small pouch, with a large capacity, to keep you safe in time of need.

Fitted with a water resistant double zip, two belt loops and a clear internal pocket.

- 50ml Dr. Browne's Hand Sanitiser
- 10 Sterile Wipes
- 2 x Type IIR Face Mask
- 10 Nitrile Gloves (Medium/Large)
- Information Leaflet
- First Aid Guide

Home Survival Pack

Code: CK072A

Home Isolation pack. In a compact, vibrant red pouch with a waterproof resistant zip, quickly accessible.

- Type IIR Mask
- 50ml Dr. Browne's Hand Sanitiser
- Water Purification Tablets
- 4 x Nitrile Gloves
- 6 x Antiseptic Wipes
- Forehead Thermometer
- Foil Blanket
- Can opener
- Snap Seal Bag
- Tissues
- Guidelines

Contents may vary.

Back 2 Work Kit

Code: CK073A

With many companies returning to work there is an uncertainty on how to stay safe. We have created packs of high quality products, tested by professionals, to keep you safe and reduce the spread of germs.

- Small and handy pocket size tin
 - Ideal for travelling and commuting
 - Issue to staff and friends to protect everyone
- We are all in this together.

Included:

- 50ml Dr. Browne's Hand Sanitiser
- Instruction Sheet
- 2 x Nitrile Gloves
- 3 x Antiseptic Wipes
- Forehead Thermometer
- Type IIR Mask
- 2 x Coin Towels

Contents may vary.

PROTECTION PACKS

Grab & Go Bag

Code: CK080

Grab and go bag, quickly accessible and ready to keep you safe in any emergency.

Strong, water-resistant material, making the Grab & Go Bag durable, strong, rip resistant and easy to clean.

5 large outer pocket all with double zips; so you can know where everything is and can access it quickly

Medical packs made to suit your individual needs.
Here are a few of our favourites.

Advanced life support emergency bag.

Its inner layout allows the user to quickly visualise and get the required material, including oxygen bottle and bag valve mask, to properly intervene in a critical situation.

 61 x 29,5 x 35 cm  4,12 kg

 63 L  1000D Polyester

Waist & leg first aid kit.

This product is specifically designed for early interventions in emergencies as the kit and its contents are very compact. It can be fastened in different ways (hand, waist and leg), thus making it suitable for all types of possible environments and situations.

 28,5 x 13,5 x 13 cm  0,83 kg

 5,46 L  1000D Polyester

PPE folding bag with wheels.

A bag to transport the PPE and other personal items of the firefighter. Made of highly resistant water repellent material, this bag incorporates wheels for easy transport. Its rolling structure allows a better storage and the bellows of the base allows to expand its capacity in a remarkable way.

600D Ripstop polyester

Large tactical rescue backpack.

This backpack is ideal for emergency rescues and assistance in difficult to access areas, where freedom of movement is essential for the user. Its XL size allows greater storage and better distribution and organization of content.

1000D Polyester

First aid leg bag.

Medium size leg first aid kit (2-3 pers). Its double opening system allows a quick and complete access to the interior. Its position can be regulated and the anti-slip bands stops the bag from moving on the leg.

1000D Polyester

Type IIR Medical Mask

Code: RK202

- Fluid resistant
- Medical Devices Directive 93-42-EEC
- ISO 13485
- EN 14689 2019
- Standard: EN14683
- 50 per pack

CE approved

FFP2 Filtering Face Mask

Code: CL292A

Hypoallergenic masks with a high efficient filtration.

- BFE > 95% filtering capacity of particles with a mass median diameter of 0.3 micrometers
- Conforms to Regulation EU 2016/425
- Protects against anti-haze, dust, bacteria, and viruses
- The nose bar can be molded around the nose bridge for a tight but comfortable fit.
- Advanced non-woven and a melt-blown fabric material
- 4 layers of soft virgin non-woven protection.
- ISO 13485
- EN149-2001
- European Made
- 10 per pack

CE approved

FFP2 Face Mask

Code: CL290

4 layer structure mask:

1. Non woven waterproof layer
2. Non woven fabric
3. Melt blown fabric
4. Non woven fabric

- Elastic ear loop.
- 95% filtration mask.
- EN 149:2001
- Lightweight, skin friendly fabric.
- Adjustable nose bridge.
- 50 per pack
- Mask can last up to 7 days depending on use.

Heavy Usage – 8 hours

Medium Usage – 3 days

Light usage – 7 days

CE approved

FFP3 Face Mask - Valved

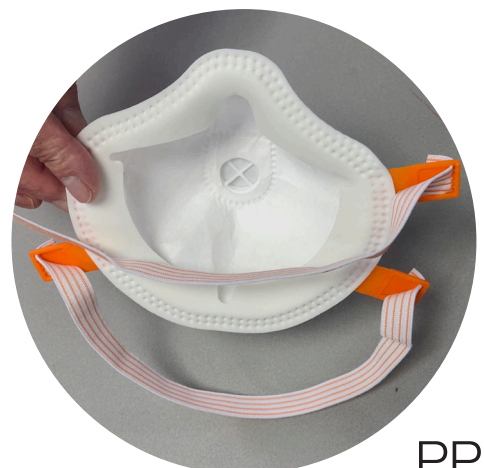

Code: CL291

- Traditional convex shape with nose clip.
- E-Valve design provides cooler and more comfortable wear.
- Inner face-seal ring.
- Reliable and effective protection against fine particles with high performance filter material
- Durable, collapse resistant inner shell
- Comfortable and lightweight
- 4-point easy adjustable straps
- 10 per pack

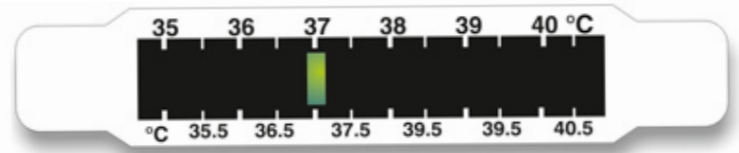

Tested to: EN149:2001+ A1:2009

CE approved

In trials these masks had a very high fit test confidence level.

PPE

Reusable Forehead Thermometer

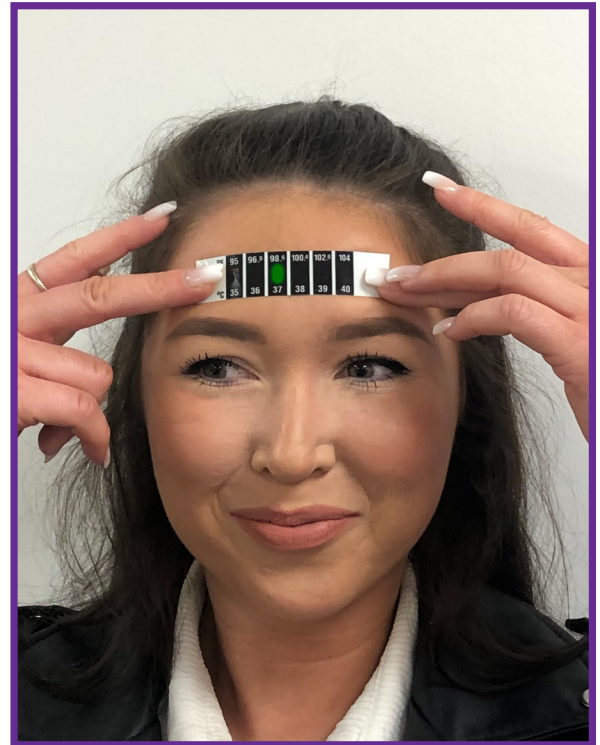

Code: RM086

For travel and regular checking. Quick, simple and reliable. Lightweight and robust, keep it handy.

These liquid crystal thermometers are for use on the forehead. Ideal and simple way to estimate the core body temperature and check for temperature changes.

CE Certified.

Size: 90 x 20mm

Infrared Thermometer

Code: CL504

Measures accurately without contact, making it cleaner and more sanitary.

The probe cover is magnetic, keeping the probe virus free.

- One Second Fast Measurements
- 40 Memory Recalls
- Audio & Visual Fever Warning
- Mute Function
- BPA & Latex Free
- Celsius and Fahrenheit Measurements

Size: 170 x 40 x 45mm

Weight: 82g

Protective Safety Goggles

Code: CL501

- Excellent field of view.
- Safety Glasses with clear, Anti-Fog Design.
- Soft pliable plastic forms an excellent comfortable seal with the face.
- 180 degree wide vision.
- Anti-smog, anti-dust vents.
- Anti-spitting splash.
- EU Regulation 2016/425.
- High degree of protection
- Two sided adjustable elasticated strap.
- High impact resistance.

Full Face Protective Shield

Code: CL223

Anti-fog transparent protective shield.
A comfortable forehead foam pad
Helps to prevent airborne infections.
EU Regulation 2016/425 as a category III product.

In accordance with EN 166:2001

- CE Certified.
- Lightweight and easy to wear.
- 25mm thick foam cushion for comfort.
- PET visor for clearer vision and recyclable.
- Peel off protective film.

PPE

Multipurpose Universal Disinfectant Wipes

Code: CL509

Kill at least 99.99% of bacteria and viruses.

Use for cleaning and disinfecting surfaces, hands and equipment.

Effective from just 10 seconds and can be used on visibly dirty hands. Our formulation is dermatologically tested and contains aloe vera and moisturiser to be gentle on skin. Trusted by healthcare professionals.

- Clean and disinfect in a single step
- Kills at least 99.99% of pathogens
- Effective from 10 seconds
- 100 per pack

Easy open and close plastic lid

- EU Regulation 2016/425
- 100 per pack

Gloves brand may vary but will always conform to EU regulations.

INNOVA SARS-CoV-2 Antigen Rapid Test

Code: CL510

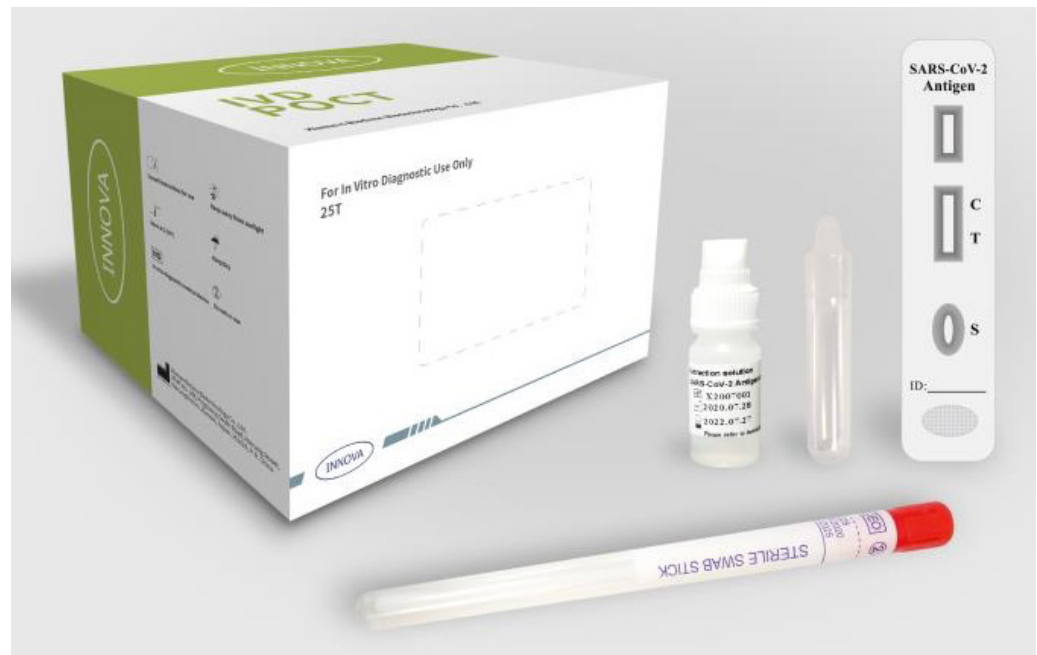

These are rapid lateral flow tests. They generate accurate results, usually within 15 minutes.

- No machine or lab required to process the test.
- No cold storage required. Store between 2 and 30 degrees centigrade.
- MHRA registered.

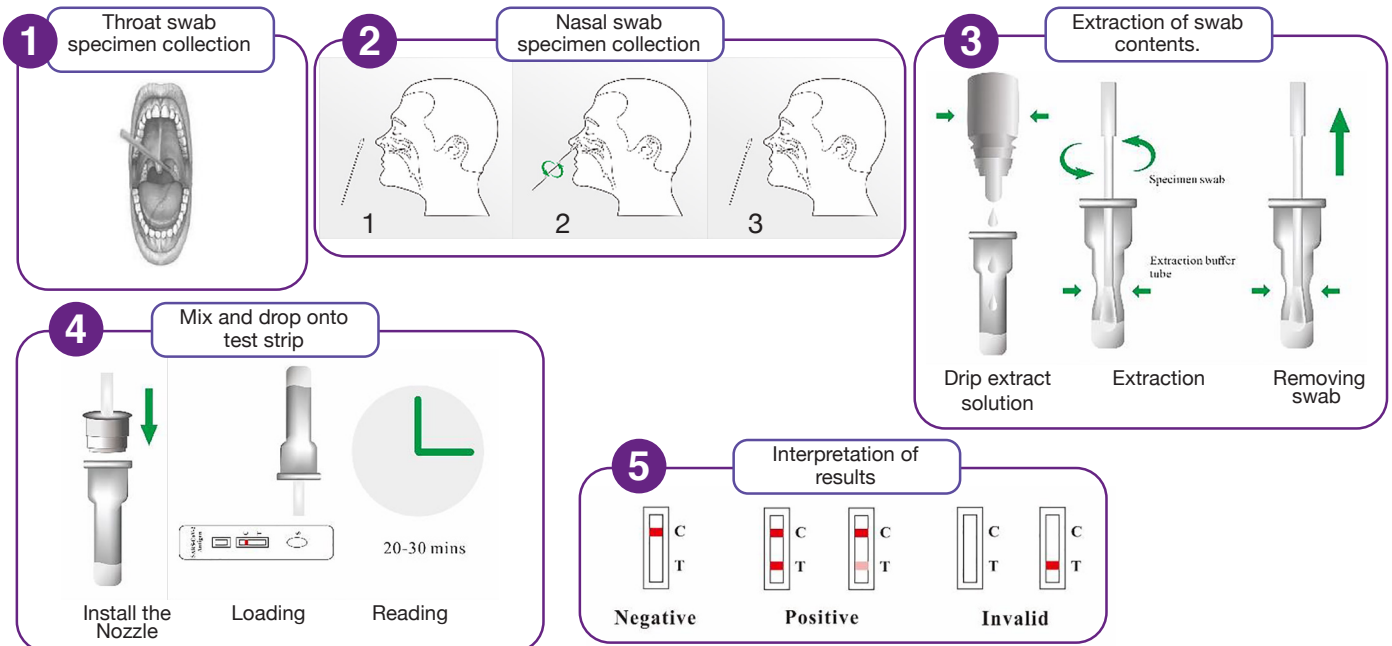

As used by the
UK Government

Scan the QR code
to read more.

Simple 5 stage test procedure

The COVID-19 Antigen Rapid Test Device detects SARS-CoV-2 viral antigens through visual interpretation of colour development. Anti-SARS-CoV-2 antibodies are immobilised on the test region of the nitrocellulose membrane.

A sample is added to the extraction buffer which is optimised to release the SARS-Cov-2 antigens from specimen.

During testing, the extracted antigens bind to anti-SARS-CoV-2 antibodies conjugated to coloured particles.

As the specimen migrates along the strip by capillary action and interacts with reagents on the membrane, the complex will be captured by the anti-SARS-CoV-2 antibodies at the test region.

Excess coloured particles are captured at the internal control zone.

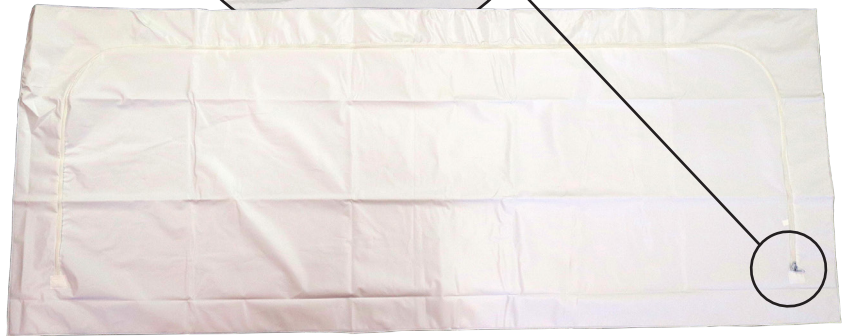

The presence of a coloured band in the test region indicates a positive result for SARS-CoV-2 viral antigens, while its absence indicates a negative result.

A coloured band at the control region serves as a procedural control, indication that the proper volume of specimen has been added and membrane wicking is working.

Body Bag

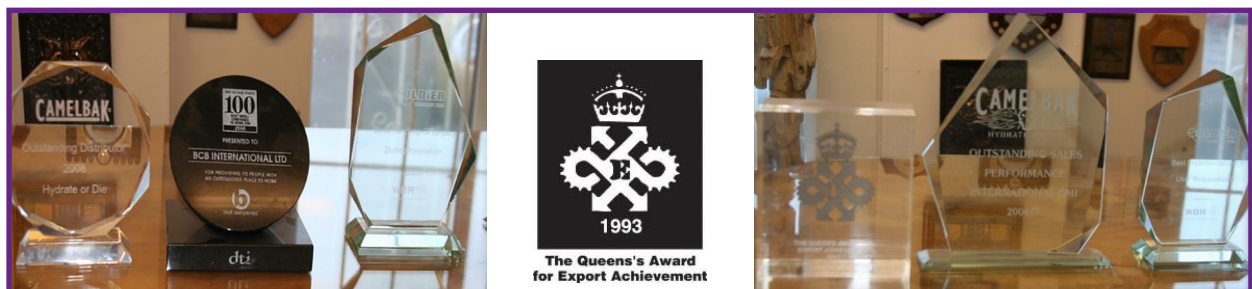

Code: CS624

- White
- 200 micron - PEVA
- Dimensions: 91x230cm
- Zip: U-shape for ease of access
- dual Pulls, (Interlocking Style)

Dependable

- Throughout the pandemic we continued to fully support our customers and manufactured 24 hours, 7 days a week.
- With two factories in South Wales we have always delivered.
- Fully automated and integrated production.
- Direct from the manufacturer.

AWARD WINNING

DONATIONS

As an organisation we are playing our part in the nations fight against coronavirus.

Our thoughts and prayers are with the families and friends who have lost loved ones, and to our brilliant emergency services, NHS staff and those working in the retail and supply chain.

To support them, we have made weekly donations of Dr. Browne's hand sanitisers.

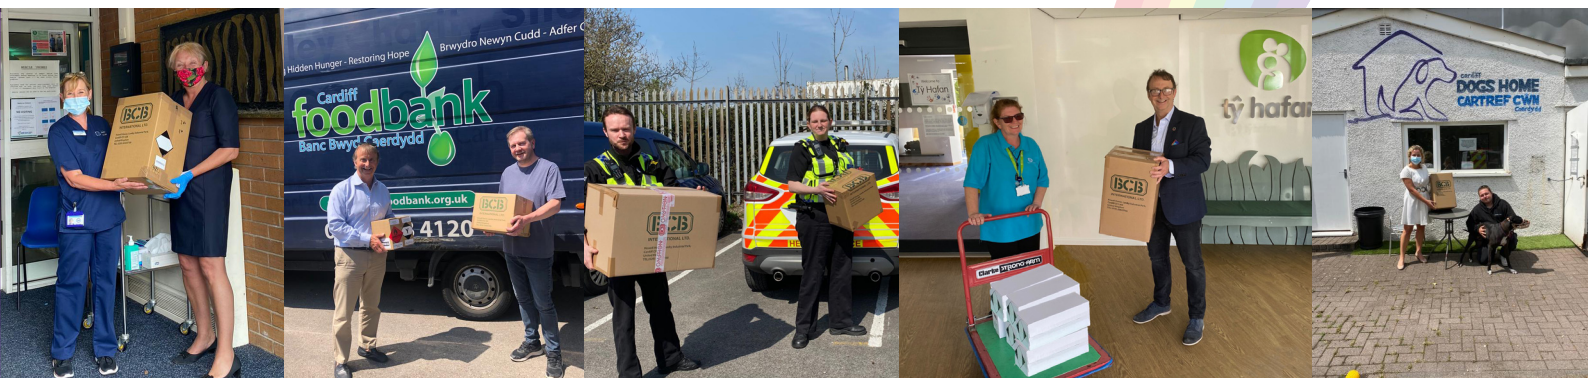

Our Directors have been circulating Wales with boxes of hand sanitiser to help keep the nations key workers safe.

From food banks to dog homes, hospices to schools we are trying to cover as much as possible.

To keep updated with our donations please follow us on social media or check our website for our weekly newsletter.

To all who are fighting Coronavirus -

Thank you

PPE MANUFACTURERS

For over 160 years, BCB International has built up knowledge and expertise in developing medical and other life-saving equipment for the front line services. Our facility has held a MHRA GMP license we have a heritage of working with the UK government department and military, as well as exporting almost 40% of our products.

Our longstanding and loyal workforce have a wealth of experience in contract manufacturing, supply chain operations, testing and product development. These skills along with our innovation and passion, guarantees consistency, quality and safety.

We've devoted our time, resources and investment into applying this knowledge when manufacturing and supplying PPE, to help fight the pandemic. We are currently supplying the NHS, British police forces and many others on the front line.

SAVING AND PROTECTING LIVES THROUGH INNOVATION

BCB is an ISO 9001:2015 Quality
and ISO 14001:2015 Environmentally Approved Company

PASSIONATE

As a family company we are passionate about what we do and will work tirelessly to develop innovative solutions for those, who go forward to help others.

EXPERIENCE

Drawing on our 166 years experience of supporting some of the world's best front line forces, this catalogue contains a selection of high quality innovative products we can offer.

INNOVATION

BCB are working around the clock in the fight on the new front line to help by manufacturing and supplying PPE. Since 1854 we have supported our troops. Today the battle is on our home front, and we are proud to support all we can at this time.

VALUE FOR MONEY

We will, whenever possible, beat any price you can show on a comparable product.

BCB SAVING LIVES.
