CONTENTS:

"I will find a way, or make one" (Inveniam viam aut facium)

These words from the great military commander, Hannibal, are a core value here at BCB International Ltd.

Passionate

We are passionate about what we do and will work tirelessly to develop equipment solutions for you who go the extra mile for our security and safety.

Experience

Drawing on over 170 years of experience supporting some of the world's best military forces, this catalogue contains a selection of high quality innovative products we can offer you.

Survivability

With hundreds of NATO approved products in our range, you can browse this catalogue knowing that our equipment is tested and proven and will not let you down in extreme conditions.

Just ask!

This catalogue is just a snapshot of what we can offer. Simply ask if you cannot find what you are looking for.

We will endeavour to find a solution for you.

Inveniam viam aut facium!

At your service.

1975

Supply medical equipment to the first successful expedition to the South West face of Everest.

1967

Developed shark repellent for US Navy,

2015

Development of FATS -Floating Body Armour System

2017 - Present

Boat Stopping & Mine Clearance Systems Development

2014 **BCB Adventure** created for the outdoor market.

2019

Adapted FireDragon for NHS as Hand Sanitiser

2021 - Present **UAV Systems**

Firelighting

All-Weather It can be lit and used in harsh conditions like wind, rain or snow

QUICK & EASY TO LIGHT A spark, match or flame will get it burning

COOKS FASTER by burning hotter and longer than other fuels

HYGIENIC It can be used to sanitise hands before handling raw food

FREDRAGEN

CLEAN GREEN COOKING FUEL

Packed safely with food

Easy to store and handle and unlike many other cooking fuels, FireDragon does not contaminate or taint food

Lightweight

Extremely lightweight, the fuel is available in 14 and 27 gram blocks. which can be easily carried and stored in pockets, backpacks or webbing

Long shelf life

FireDragon has a shelf life of 5+ years

Low luminosity

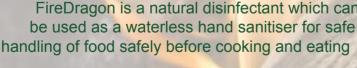

Emits very little light when burning so as not to give away your position to the enemy

Hand cleanser

FireDragon is a natural disinfectant which can be used as a waterless hand sanitiser for safe

All Weather

Quick & Easy Clean Burn to Light

Waterproof

Easy to light

Non-toxic

Watch FireDragon in action:

Powerful cooking fuel

Eco friendly

Made from sustainable, naturally derived bio-ethanol - made from waste vegetation

Non-toxic & odourless

Unlike other cooking fuels, FireDragon burns without noxious or toxic fumes. It can also be used indoors (with suitable airflow)

Compatible with most cookers Can be used with a variety of portable cookers

Fast boil & long burn In average conditions, each block of fire dragon burns for approximately 8 minutes and boils 500ml of water in under 5 minutes

Air transportable

Safe to be packed and transported on cargo

High calorific value 29,000 (kj/kg)

Clean burn

Burns with very little soot or residue so doesn't dirty cooking equipment

Made in the UK Sourced from British grown grain stocks and made in South Wales

Patented

Worldwide, patent - no other cooking fuel like it on the market

ALMOST NO GREENHOUSE GASES EMISSIONS

MADE FROM SUSTAINABLE SOURCES FOSSIL-FREE FUEL

Firelighting

FIREDRAGON SOLID FUEL

A new, innovative & environmentally friendly solid fuel

@FireDragon_fuel

@FireDragonfuel

@FireDragonfuel

Non-toxic and odourless

Highly effective, high burn fuel

Easy and quick to ignite

Easy to store and handle

NON-TOXIC ODOURLESS

100% NATURAL

Very little soot given off, so doesn't dirty your cooking pot or mess tin

Each block will burn for about 8 minutes

Will light & burn even when wet

Can be used with a variety of cookers

Made from sustainable, natural biofuel

FIREDRAGON FUEL BLOCKS: 6 X 27G

The all-weather ECO biofuel & firelighter made from UK sourced ethanol. Suits multi-fuel outdoor cooking stoves

Code	CN336G	
NATO	NSN-9110-99-426-2694	
Å	6x 27 grams (0.9oz)	
որոփոփո	40 x 67 x 25mm (1.5 x 2.6 x 1")	

In the driving rain, the freezing Arctic, at high altitudes or searing heat, FireDragon performs, even in extreme conditions

FIREDRAGON GEL/SOLID FUEL

FireDragon Solid fuel is ideal in the outdoors to cook your rations and boil your brews quickly and safely, Research shows that FireDragon boils water quicker than all other non-gas fuels (500ml = Under 7 minutes)

Made from a 96% purity of ethanol, FireDragon gel fuel can be used in multifuel outdoor cooking stoves, barbecues, and for fire lighting

	Code	Size	Form
	FD104	200 ml Bottle	Gel
	FD103	1 litre Bottle	Gel

Escape/Evasion Kits

PLAN A - ESCAPE KIT

Personnel are more likely to succeed and survive with the right equipment and training. This is reflected in BCB's new escape kit.

Designed with modern operational experience this modular high specification kit is in a useful travel pouch and can also be broken down into different modules to be held on the person or in clothing.

A hookit tool and luggage tag - to bypass latch locks • Combination padlock bypass tool • Lock Picks • Hook and spike bypass tool - to deactivate lock on handcuffs • GTFO wrist strap • Escape necklace - contains a handcuff key, R clip for manual dexterity, a shim and a striker bead • A go tube-designed to hold escape items in a concealable, lightweight, waterproof manner. • Extra long handcuff key • SAD tool to escape from handcuffs and padlocks • High Tensile Steel Safety Pin • A firesteel - produces sparks of 3000 degrees Celsius • Ceramic razor blade • Mini lightsticks • Button compass • An Aide memoire • 72cm x 57cm Fabric escape map

Code	CK0692
À	212 grams (7.5oz)
uhadudu	21x11x3.5cm (8.2x4.3x1.3")

Personnel requiring escape equipment will also likely require specific survival equipment. For customised escape kits please contact the expert: bob@bcbin.com

For: SERE, ESCAPE & EVASION KITS, COUNTER CUSTODY **TOOLS, HANDCUFF KEYS**

- HANDCUFF SHIMS
- LOCK BYPASS TOOLS
- DEEP CARRY & CONCEALMENT

We have researched, developed, designed and manufactured special tools, covert carry and concealment devices for law enforcement, military personnel, security agencies that are prone to abduction, kidnap, restraint and unlawful detention while serving abroad - usually thought of during conflict.

> Train to become expert with these tools Contact: info@bcbin.com

PLAN B COUNTER CUSTODY KIT

Fast Track Counter Custody Kit that can be donned or removed in seconds.

All content is safely stored within the tube & lid which remains waterproof and secure.

- · Go-Tube IWB Strap 2.0
- · Lightweight, airtight, waterproof/mildew-proof silent
- Uber gulag shim 3.0
- T200 high speed friction saw
- SAD-tool 3.0
- · Combination padlock bypass tool
- Anhua handcuff escape key
- · Acrylic signal mirror disk
- · Micro striker bead TungstenCarbide
- Micro light stick1.5 inch
- Darby tube push'n'pull
- · Hair-Grip to replicate SAD-Tool

The Advanced Personal Escape Kit allows for essential restraint escape tools to be neck carried out of sight but ready for immediate deployment.

It is not necessary to remove this necklace when passing through airport security.

Concealed inside the plastic breakaway connector the MSB is hidden until you require it.

- Tech 205 Cord (Escape Necklace)
 for use as a friction saw
- Advanced Handcuff Key retrofit (AHK3-rf)
- R Clip
- Uber Gulag Shim 3.0
 Works on British TCH, Czech ALFAproj, Polish
 KEL-MET, Russian BRS-2, Russian CROT and
 Spanish ALYCON.
- Micro Striker Bead (MSB) for breaking tempered glass
- Micro-SQ-LIGHT

LOCATION MARKER BALLOON

The BCB Location Marker Balloon is a ground to air

signalling device, to communicate with search & rescue, when other forms of communication (eg radios) don't work.

Design by the military for the military it is quick and easy to use in the jungle or forest, under the canopy.

The carbon fibre bottle holds the Helium, which the user transfers into the 136L over 1m bright, two tone balloon.

The kit includes a 75m (250 foot) lightweight tether so the balloon doesn't disappear - the balloon, once filled, can stay aloft for many days. Visible from 10km or more.

Can be used day or night. Attaching lightsticks increases visual detection.

Camouflage: Creams

Cosmetic grade camouflage paint in easy to apply squeezy tubes.

CNDS: COMBAT NET DEFENCE SYSTEM

Provides: VIS NIR TIR UV Protection

Ballistic protective camouflage cover against drone or loitering munitions; Direct & Indirect.

Made from special Dyneema twisted UHMPE yarn.
A lightweight practical solution for maximum protection
Outer covering offers Infrared, thermal and Visual camouflage.

- · Lightweight, easy and quick to deploy
- 50% volume reduction and almost 70% weight reduction compared to regular PE
- · High strength to weight ratio
- Twisted and Double knotted to prevent slippage
- · 3D visual camouflage
- · Coating for long life
- · High strength Dyneema

CAN BE MANUFACTURED TO ANY CONFIGURATION REQUIRED, LIKE FITTING OVER A TRENCH, A SPECIFIC PLATFORM OR VEHICLE. CAN ALSO BE JOINED TOGETHER TO MAKE LARGER NETS.

Camouflage: Systems

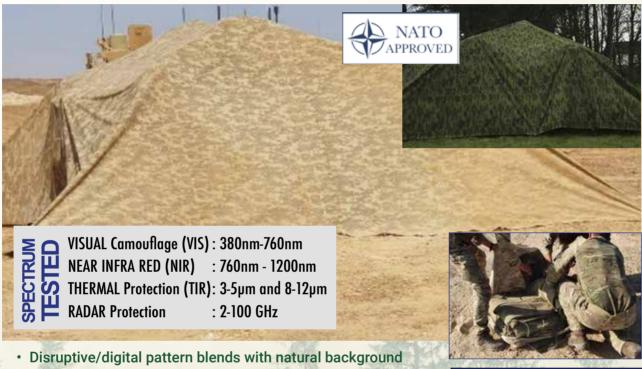

MULTI-SPECTRAL (MSC) 2-D SYSTEM

Provides: VIS-SWIR-MWIR-LWIR Protection

Our NATO issue, Infrared-reflective camouflage system remains pliable, even in extreme temperature ranges.
MSC 2-D is lightweight, non snag and quiet.

GCB cam nets greatly enhanced both the concealment and agility of formation reconnaissance elements. Robust MS cam nets are assessed to be a relatively low-cost essential enhancement for the modern battlefield and should be codified as a part of the mech vehicle fleet immediately.

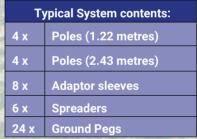

British Army trials report, Dec 2023

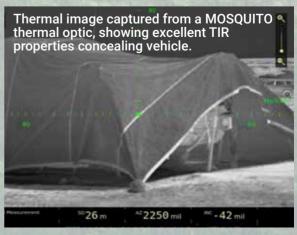

- · Excellent visibility from inside-to-out, plus look-out panels
- · Improved crew-shading
- Reduced snagging
- Low storage and easy deployment
- Edges finished in 'Dutch lacing' for easy deconnection
- · Double-sided, reversible pattern to suit two environments
- · Trialled extensively by British Army
- · Operational temperature range:
 - -45°C to +70°C.

SPECIFICATIONS:

- » Tear Resistance: Warp: 24 N Weft: 23 N (DIN EN ISO 13937-2)
- » Breaking Resistance: Warp: ≥ 288 N Weft: ≥ 282 N (DIN EN ISO 13934-1)
- » Rubbing Fastness (dry): ≤ 3 ISO 105-X 12
- » Resistance to Petroleum Oil: No deformation
- » Air Permeability: 2398,5 mm/s (EN ISO 9237)
- » Fire resistance (ISO 6941)
- » Washing Fastness: ≤ 4/5 ISO 105 C01
- » Water Fastness: ≤ 4/5 ISO 105 E01

A range of sizes are available in MULTI-TERRAIN, WOODLAND/ MOORLAND or DIGITAL WOODLAND/URBAN

MK8 3D MOBILE VEHICLE CAMOUFLAGE

Provides: VIS NIR SWIR MWIR LWIR RAD Protection

MS Mobile Camo is tailored to specific vehicles as applique panels which attach via instant hook and loop fixings to each part of the vehicle, over engines and around exhausts, aerials, etc.

The system prevents the detection of moving assets such as armoured vehicles, tanks and weapons systems by all current reconnaissance or surveillance sensors.

- Provides highly enhanced protection in the VIS, TIR, NIR & Radar spectrums
- Fire resistant
- Modular structure
- Solar load reduction
- · Easy installation and collection

Customised to each vehicle

Different textured finishes possible

Available in different camo patterns to suit different environments

CAN BE MANUFACTURED TO ANY CONFIGURATION REQUIRED, TO FIT AROUND AERIALS, EXHAUSTS, MAINTENANCE PANELS, OBSERVATION OPENINGS. ETC

Camouflage: Vehicles/Assets

ULCAT - ULTRA LIGHTWEIGHT CAMO TUNNEL

Provides: VIS-SWIR-MWIR-LWIR Protection

For rapid vehicle concealment and deployment
The vehicle tunnel is made from specialised 3D material which is lightweight and snag
free. It conceals in the Visual, Infrared and Thermal spectrums.

- · Natural 3D pattern blends with nature
- Non-absorbent. Non-snag and breathable material
- Quiet, Lightweight and Fire Resistant
- Excellent visibility from inside-to-out
- Material Operational Temperature range -45°C to +70°C
- · Fast-opening front/back doors for rapid vehicle insertion/evacuation
- · Two quick opening lateral doors for personnel entry.
- · Can also be used as a camouflage screen without poles, spreaders etc.

ULCAT concealing Vehicle and personnel when viewed through Fusion IR scope.

BLAST BOXER™ MKI

Compression design **conforms to the body** with stretchy side panels.

Flat locked seams for **low bulk and low friction.**

High wicking fabrics allow sweat to evaporate quickly with minimal drying time.

High fabric permeability - **Breathable**, just like wearing regular underwear.

Can also be supplied with or without the ballistic inserts.

DuPont™ Kevlar® performance maintained after 25 washes at 105oF.*

Ballistic insert protection V50 17gr FSP = 1391.5 ft/s.

Anti-microbial fabric next to skin. Tested to AATCC 100 with 99% bacteria reduction after laundering in accordance to AATCC 135.

Sculpted design Box brief styling with sculpted genital area, 4" fly opening and overlap of ballistic material at the fly opening.

The ballistic inserts are **soft and highly flexible**.

They **do not interfere with comfort during walking or running**

Garment fully lined with the soft comfortable fabric to **minimise chaffing**.

Greater protection - less weight

Insert cover is welded to make them waterproof.

Berry Amendment and made in America Act compliant.

Internal heat transfer care label.

Laboratory and field tested.

Patented - 8533863

	PAGE AND RESTORED TO A PROPERTY
Code	CB289
Å	Medium - 141 grams (5oz)

Protects the femoral arteries

Fully blast tested:

Fragmentation penetrated only 1 layer

Ballistic gel with large fragment

Result from 15kilo charge - Material still intact

Zero trauma to femoral artery area following 5kilo charge

Protective wear

PROTECTIVE OVER GARMENT (P.O.G)

The POG strap is designed to be worn over combat trousers, providing **comfort** as well as **high level ballistic protection to the groin and posterior.**

The front portion is designed with a clip to enable the wearer to easily urinate, without having to doff or unravel the garment.

- · Front can be worn separate to the rear section
- Easy to don and doff
- Cupped shape at front provides space & airflow
- Overall weight of just 970 grams. Front portion weighing just 480 grams
- · Rear attaches with one clip at the front and two G-Hook at the sides
- Adjustable to fit various shapes and sizes
- · Rear attachment elasticated to conform to the wearer's movements in use
- · Rear can be folded to stow on back of wearer
- · Robust and abrasion resistant 500 denier Nylon carrier and Nylon webbing
- · Groin section is soft and flexible for comfort

F.A.T.S

Floating Armour Torso System

comfortable, buoyant and strong

This innovative system provides comfortable armour with an integrated life jacket.

The removable inflatable stole is located underneath the high performing level IIIA armour pack. This protects the wearer and the life jacket from bullet or fragment threats.

Having the lifejacket under the body armour also gives it a **low profile close fit.**

Other body armours with a neck external lifejacket catch on the helmet.

The gas inflatable stole is kitted out with an automatic trigger which deploys within seconds in water.

The armour vest expands around with the bladder when activated to provide continuous protection.

Extensively independently tested.

Available with a 175 Newton and a 275 Newton floatation capability.

Export licence needed for all Body Armour

Automatically inflates within approximately 3 seconds of water immersion

Life jacket can be removed if not required and the body armour can be worn independently

Up to 275 newtons of cylinder buoyancy can be topped up by manual inflater tube

Unique 4 point expansion system allows the life jacket to inflate without crushing your chest

Tabard style tactical armour vest

Fully functional all-round **MOLLE system** to suit the task in any terrain

Removable **inflatable lifejacket** (Stole), with a choice of 175N or 310N capability

Vest expands with the inflation of the stole

Self rights to clear airways from the water

Fully adjustable at the sides

Internal elasticated waistband **distributes the load** of the vest

Rear grab handle

Mesh lining for better airflow and rapid drainage

Easy access bladder for re-arming, servicing and cleaning

Lightweight PU coated Nylon 500 denier outer fabric

Removable and adjustable crotch strap

Water resistant aramid used

Ballistic inserts made of **low density and buoyant**Ultra High Molecular Weight Polyethlene (UHMWPE)

Inserts protected with welded lightweight waterproof covers

Choice of protection tested in accordance to NIJ 0101.04 or NIJ 0101.06

Front and back 25 X 30cm (10"x12") hard armour plate pockets

Protection level NIJ IIIA

Two options available:

Marines, navy and coastguard

270 Newtons for use during land assaults, ship boarding and general boat use. Large capacity for when wearing/carrying a rucksack heavy belt kit and weapons

Medical

FOLDING STRETCHER

The folding stretcher is a duo-fold design, allowing a normally bulky item to require minimum storage space when not in use

- The aluminium frame, is both strong yet lightweight
- Stretcher bed is resistant to fluid and is extremely easy to clean
- · Once locked open, the frame keeps the patient clear of the ground
- · High strength aluminium alloy frame
- · Waterproof, fireproof, anti-cracking material
- · Hi-Vis orange or olive
- · Easy to clean

Folds both horizontally and vertically:

Minimal Storage Space

INFLATABLE STRETCHER

The super lightweight Inflatable Stretcher floats. Great for marine or mud environments.

The stretcher is able to be packed down into a small back pack to make it easier for transportation.

- Light weight and easily portable
- Compact
- Easy to Deploy
- Ideal for casualty recovery in tight or difficult to reach areas
- Individuals are secured with a quick release restraint harness
- The recovery board will comfortably accommodate adults up to 198cm (6'6") tall and 150kg (23.5st) in weight.
- Minimal training, servicing and maintenance costs

Non-lethal Deterrent

BOAT STOPPING SYSTEMs (BSS)

BCB has many years of experience producing non-lethal Boat Stopping Systems (BSS). These three variations each use a pneumatic launcher that fires an arrestor line across the bow of a suspect or intruding vessel.

This provides a non lethal, quick, easy and reliable means of stopping vessels. The BSS are unique, patented maritime defence systems which are non lethal, 100% effective, simple to use and extensively tested.

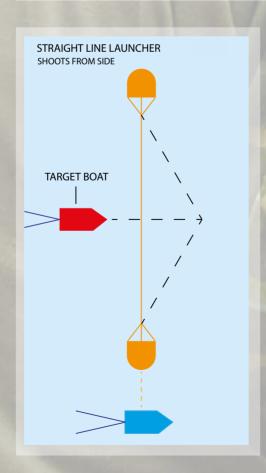

The arrestor line system is simple and effective

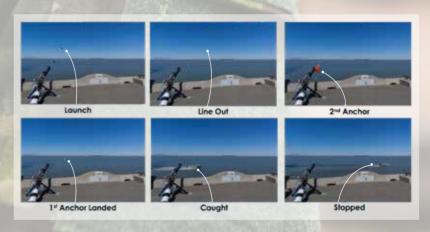

Each system fires a floating Dynema or Spectra line with a sea anchor at both ends.

The line and sea anchors are launched, and the sea anchors deploy.

The floating line catches on the rudder or the propeller shaft. The sea anchors inflate and create many tons of drag to stop the target vessel.

- The line and sea anchors are launched in a streamlined container (the munution)
- The floating line captures the cavitation plate/antiventilation plate on outboard or inboard/outboard motors, or the boat's rudder etc.
- The sea anchors deploy and inflate to create many tons of drag to slow the target vessel to a stop in seconds.
- The line normally does not foul the propeller or damage the vessel.

A hand-held device capable of launching a 30 metres arrestor line and two 3 ft (1metre) sea anchors.

Operates at a low pressure of 12.5 Bar / 180psi (per square inch)

Non-lethal Deterrent

The Buccaneer KIS delivers projectiles designed to deter and disable small fast sea craft at extended range

With a range of up to **100 meters** the Buccaneer KIS uses specialised payloads to lay **buoyant line** for interdiction operations.

The Buccaneer KIS is extremely flexible having a 360 degree rotation and depression and elevation of 45 degrees from horizontal.

The Buccaneer can be operated remotely from the bridge or control room quickly and safely and uses **no explosive or pyrotechnics parts in its use**.

It can be loaded with alternative projectiles to:

Lav netting over a wide area

Lay a buoyant line or lines to entangle propellers of assaulting crafts
Dispense airburst smoke or an irritant gas
Dispense widespread multiple small projectiles, scatter-gun over 50m².

PROJECTILES: Non lethal - like paintballs

Less than lethal - like squash balls **Lethal** - like gravel or golf balls

This provides a layered defence

- The lethality can be increased if the approaching craft is not initially detered.

Alternatively, it can deploy:

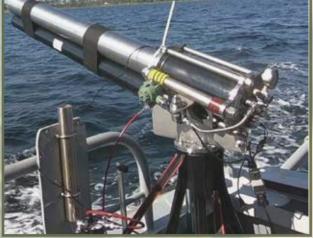

Survival items to a man overboard like a single seat liferaft or buoyancy aids

A rope line to shore for mooring, or to another vessel for towing

FEATURE	BUCCANEER
Barrel Inner Diameter	108 millimetres
Barrel Length	1365 millimetres

70 kilograms (Exc Stand) (154.3 lbs			
nlmhalm	1170 x 300 x 270 m (46 x 11.8 x 10.6 inches)		

The Sea Stinger is used as an 'Area Denial System' for large marine key point installations such as oil rigs, ports, estuaries or large cargo vessels that are vulnerable to acts of piracy or terrorism.

The 'big brother' of the Buccaneer, the Sea Stinger is able to deploy entangling net out to a range of more than 300 metres.

The line/net can be recovered and re-used.

The Sea Stinger provides a non lethal deterrence and defence against incursions into vulnerable water ways and areas of sea. It is both simple to use and maintain.

Reloading is quick and easy, taking only two minutes

Dockside mounted or on board a ship

Rapid mine clearance system

APE MORTAR

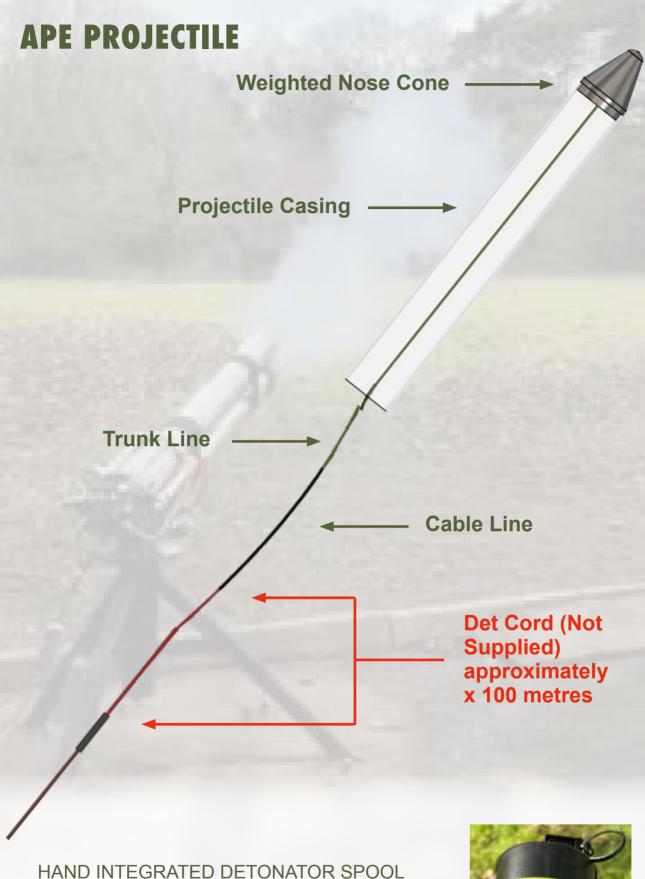

The Air Mortar is a fast-acting pneumatic system, designed to provide a rapid discharge of inert gas when triggered by 24VDC input signal. The standard system vessel has a volume of 25 litres but can be supplied in other volumes, it can be operated at any pressure upto 40 bar (580psi).

- Vehicle or trailer mounted
- Uses compressed air (Scuba Tank)
- Remote firing
- Two man operation
- Deployable in under 2 minutes
- Projectile weight 30 kilos approx
- Range (40 bar pressure) 100 meters

HAND INTEGRATED DETONATOR SPOOL Using a standard percussion firing cap with a flyoff lever mechanism.

- Snag free deployment of shock tube
- Reliable and dependable mechanical
- Firing system 3.0 mm single shock tube
- Waterproof Detonator Provided with Detonator clip

SAFE LANE MINE CLEARING SYSTEM

The SAFE LANE is designed to accept additional explosives in seconds making it the perfect system for Sappers, Infantrymen and Explosive

Ordnance Disposal units.

- Pouch/Pocket to use in seconds
- Safe, quick arm/dis-arm
- Effective and modular
- No additional Fragmentation
- Light weight
- Variable length and Explosive Weights
- Legacy compatible

It Will Breach:

- Paths, Doors, Walls, Fences, Gates
- Placed Obstacles/ Hasty Obstacles
- Mines, Weapons caches

FIBRELIGHT RECOVERY CRADLE

A Maritime recovery system that can be operated by a single crew member. The Cradle also serves as a **boarding ladder**, **scramble net and stretcher**.

The Fibrelight Cradle is **lighter**, **more compact and more versatile** than any comparable devices on the market.

Requires only regular inspections and minimal maintenance, so there is no requirement to pay for annual servicing.

The Cradle has been primarily designed for use by rescue craft, rigid inflatables, ship lifeboats and Marinas.

The standard dimensions are 1.3 metres wide by lengths of 2, 3, 4, 5, 6, 7, 8 and 9 metres.

Rescue

INFLATABLE RESCUE CUSHION

Used for rescuing people when it is not possible to use a ladder. The unit is very fast to deploy and facilitates rapid evacuation. It is very stable and there is almost no bounce-back. The cushion always deforms towards the centre and it is easily transported whether packed or inflated.

The Inflatable Rescue Cushion comprises an inflatable frame which supports a high strength, flame retardant PVC coated fabric. Inflation is from a 300 bar air cylinder, the connection for which will be compatible with the brigade standard. Relief valves are fitted to prevent over pressure but the operating pressure of the tubular framework is sufficiently high to ensure extended service periods without topping-up. As the frame inflates air enters the cushion, which is divided horizontally into two chambers, through vents in the side walls. The force of a person landing on the cushion temporarily deforms it towards the centre. Air from the cushion (but not from the tubular frame) is forced out and so the impact is absorbed. On removing the person the cushion recovers its form within seconds.

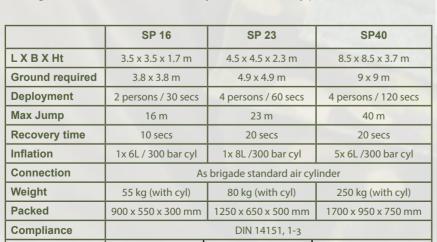

CT099

Surface Conditions: May be placed on almost any surface including gravel and kerbstones, although very sharp objects or glowing embers can damage.

from cockpit windows on burning aircraft or for aircraft without escape slides.

Moving the Rescue Cushion: Carrying points on all four sides enable even the largest inflated cushion to be easily moved and finely positioned.

RESCUE BRIDGE

The inflatable bridge with a difference

The rescue bridge is an inflatable rescue path for accessing casualties during rescue on mud, ice as well as water rescue.

The rescue bridge can also be used as a bridge to cross rivers, streams or gullies. Catamaran style 'footprints' offer **enhanced stability** on water

- Lightweight for easy portability
- Rapid inflation, deployment and mobility
- Total stability for recovery or as a work platform.
- The twin sponsors on the underside increase the stability in water and reduce the friction when used on mud
- Inflated from a single point for speed of inflation and air transfer valves are fitted between the path and the sponsors to isolate the separate chambers
- Stowage pockets are fitted to the end of the each containing a rescue line and rubber ring Lifelines fitted to all sides
- Can be used as a temporary pontoon, rescue raft, platform or access path
- Rapid extension 'link-up'
- · Reflective tapes fitted for night visibility
- · Strong and durable for a long service life
- Towing points fitted to both ends
- Non slip top surface

BCB COMMITMENTS

Designing with local Universities, and centers of EXCELLENCE

Committed to QUALITY

- Over £1 million invested into R&D
- Rapid prototyping

CARDIFF

UNIVERSITY

- Lifetime, invention, trialing, innovation
- Manufacturing locally
- Continuous And Never Ending Innovation CANEI

Committed to INNOVATION

We strive to fully meet your needs and expectations. To do this we maintain:

- High Quality Control Standards
- Continuous Ongoing Improvement of Systems and products

Committed to OUR CLIENTS

BCB's team will help to look after you. We pride ourselves on being reactive and rapid in our response.

What's more, we aren't alone: We have a global network of authorised suppliers, with whom we have a close relationship.

We are big enough and with enough experience, to supply at scale to your urgent needs. Small enough to care and customise for you.

..these 14 UN Sustainable Development Goals

BCB MANUFACTURING SOLUTION

is an ethanol based fuel, made from vegetable waste.

SUSTAINABLE and SAFE

BY ADOPTING
THIS FUEL
the UK MOD
HAS SAVED
EMITTING
tonnes of
CO, CO2, NO
PAH, Methane
and Cyanide

EMITS MINIMAL GREENHOUSE GASES

compared to most other fuels.

REDUCTIONS

FIREDORACE

ADDRACE

ADDRAC

CARBON MONOXIDE 77 MILLION TONNES COMILLION TONNES

METHANE
1.17 MILLION
TONNES

BCB AIM: ECO FUEL IN AFRICA

THE CHALLENGE:

PROVIDE A SAFE ALTERNATIVE TO FOSSIL FUELS WHICH SIGNIFICANTLY REDUCES EMMISSIONS

Fuel made from vegetable waste = sustainable and eco-friendly

Virtually NO greenhouse gases compared to other fuels = carbon neutral.

Introduction of FireDragon = 100's Tonnes Reduction of greenhouse gasses.

BCB are committed to future sustainability.

THE SOLUTION:

Our big ambitious aim is to introduce FireDragon to the almost 950 million people in Sub-Saharan Africa who still use wood, charcoal and hexamine as a cooking or heating fuel.

We estimate that the adoption of FireDragon in Africa would: *

REDUCE Carbon Dioxide by 20,000,000 tonnes

REDUCE
METHANE
by

100%

REDUCE
Deforestation by
725,000
hectacres p.a.

THE BENEFITS:

REDUCE Nitrogen Oxides by 36,000,000 tonnes REDUCE Carbon Monoxide by 77,000,000 tonnes

BCB AIM: ECO FUEL IN UKRAINE

THE CHALLENGE:

THE SOLUTION:

FREDRAGON

FEATURES

- RESISTANT to infrastructure damage
- SMOKELESS AND ODOURLESS essential to indoor cooking and frontline.
- Produced from LOCALLY MADE ETHANOL
- COMPATIBLE with multiple stove/cookers
- SAFE and easy to transport.

HEAT to more than 10 million people without electricity.

facitilies to up to 6 million households.

Cooking and heating facilties to PEOPLE ON THE FRONTLINE.
