WHY DR BROWN'S HAND SANITISER?

Dr Brown's is one of only a few hand sanitisers on tested, and proven to kill, Coronavirus.

Coronavirus is a virus not a bacteria, so we have gone the extra mile and ensured Dr Brown's is tested against viruses, specifically against Coronavirus EN14476 and A2:2019 viricidal test, proves Dr Brown's efficacy is to Log 4 or 99.99% effective against viruses.

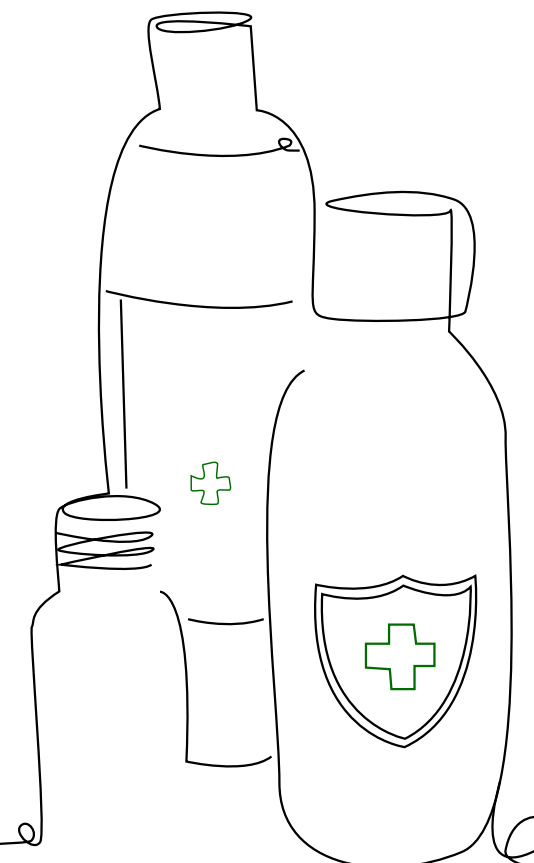

We believe hand sanitisers should be tested against viruses and specifically the Coronavirus. Bacteria tests, although useful, are not as relevant post-COVID as viruses are a lot more virulent.

Hence why Dr Brown's is extra strength 80% alcohol.

**KILLS 99.99% OF VIRUSES &
99.999% OF BACTERIA**

DONATIONS

As an organisation we are playing our part in the nations fight against coronavirus.

Our thoughts and prayers are with the families and friends who have lost loved ones, and to our brilliant emergency services, NHS staff and those working in the retail and supply chain.

To support them, we have made weekly donations of Dr Brown's hand sanitisers.

Our Directors have been circulating Wales with boxes of hand sanitiser to help keep the nations key workers safe.

From food banks to dog homes, hospices to schools we are trying to cover as much as possible.

To keep updated with our donations please follow us on social media or check our website for our weekly newsletter.

To all who are fighting Coronavirus- Thank you.
